Aayush Gnawali

Kathmandu, Nepal — aayushgnawali45@gmail.com
github.com/AG-Aayush — LinkedIn — Portfolio

Summary

Information Technology graduate with hands-on experience in Linux system administration, Docker, CI/CD automation, and AWS cloud deployment. Built automated deployment workflows using GitHub Actions, Docker, Amazon ECR, and EC2, with practical exposure to Bash scripting, SSH, infrastructure troubleshooting, monitoring, and security practices. Seeking a DevOps Trainee position to support development/staging environments, deployment workflows, cloud operations, and infrastructure automation while growing with an experienced DevOps team.

Experience

DevOps Intern **Lego Tech Pvt. Ltd.**
Remote

- Gained practical experience in Linux server administration, network troubleshooting, and writing Bash automation scripts.
- Supported CI/CD processes and Git workflows while applying DevOps infrastructure and security best practices.

Backend and QA Intern **E-Digital Nepal Pvt. Ltd.**
On-site

- Collaborated with Dev and QA teams during application deployment cycles to verify staging environment integrity and features.
- Developed backend services using Python and PostgreSQL for APIs, authentication, and secure data access handling.
- Executed backend/API tests with pytest and used Selenium for browser-based regression testing and workflow validation.

DevOps & Technical Projects

CI/CD Deployment Pipeline – React Web App on AWS EC2 GitHub

- Built an automated CI/CD pipeline using GitHub Actions, Docker, Amazon ECR, and EC2 to containerize and deploy a React web app.
- Configured GitHub Actions CI jobs for linting, build verification, and automated image publishing to Amazon ECR on main pushes.
- Implemented automated SSH deployment to Amazon Linux 2023 EC2, including configuration updates, container replacement, and status verification with curl.
- Troubleshot ephemeral EC2 networking and Security Group firewall rules, including public IP changes after instance restarts.

FlipClock-Desktop-Digital-Clock Live Demo — GitHub

- Developed a Python/PyQt6 desktop clock application featuring split-digit display, system-tray operation, auto-start, and custom settings.
- Automated security checks and linting with GitHub Actions CI, CodeQL static analysis, and Dependabot updates.
- Built and published a Dockerized web companion package to GitHub Container Registry (GHCR) using automated container workflows.
- Documented deployment setup, infrastructure configuration, troubleshooting procedures, and CI/CD workflow in the project README.

Rule-Based Self-Healing Web Automation System – *Final Year Major Project* GitHub

- Engineered a self-healing test automation framework that detects DOM element changes and recovers broken workflows.
- Implemented dynamic locator fallback strategies and browser-state tracking to reduce test flakiness and maintain workflow resilience.
- Implemented automated error logging, telemetry, and DOM analysis to support failure diagnostics and infrastructure health monitoring.

Technical Skills

Cloud & Orchestration	AWS (EC2, ECR), Docker, Docker Compose, Kubernetes (basic), Terraform (basic)
CI/CD & Automation	GitHub Actions, GitHub Packages (GHCR), CI/CD Pipeline Setup, Infrastructure Automation
Linux & Scripting	Linux System Administration, Bash Scripting, Git, SSH, Networking Fundamentals, Monitoring & Logging
Development & Testing	Python, FastAPI, Async SQLAlchemy, REST APIs, PostgreSQL, JWT Authentication, pytest, Selenium
Tools & Environment	Ubuntu/Linux, VS Code, Postman, Swagger

Education

B.E. in Information Technology **2022 – 2026**
Everest Engineering College, Pokhara University

Higher Secondary Education (+2 Science) **2020 – 2022**
Trinity International College

Certifications

DevOps and Cloud Computing Training – Upskill Nepal, 2026
AI/ML Workshop – ITSNP, 2025
Robotics Training – EEC, 2025

Recognition & Leadership

- **Chief Content Writer, Hult Prize OC** – Everest Engineering College, 2025. Led content strategy; team ranked top 25% in South Asia.
- **Best Minor Project** – Everest Engineering College, 2025. Awarded best minor project among all 6th-semester submissions.
